M. ABRAR PATEL

Full Stack Developer | Django/DRF · React · Next.js · React Native · PostgreSQL · AWS · Docker

+91 7249361481 | abrarpatel454@gmail.com | abrarbyte-portfolio-web.vercel.app | github.com/Abrarbyte | linkedin.com/in/abrar-patel | Mumbai / India · Open to relocate

PROFILE SUMMARY

Full stack developer who ships complete products end-to-end: data model, REST APIs, web and mobile clients, tests, deployment and production support. As the **sole developer at Aarmarks Media, shipped 2 production applications in under 3 months** on Django/DRF with React Native and Flutter clients, deployed on AWS. Also built and launched **DukaanAI**, a business platform with 45+ REST endpoints, UPI payments and an LLM assistant. Works well with high ownership in small, fast-moving teams, and uses AI tools every day to build and debug faster.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL · also C, C++, C#, PHP

Front-end: React, Next.js 15, HTML/CSS **Mobile:** React Native, Flutter

Back-end: Django, Django REST Framework, Flask, FastAPI, REST API design, JWT auth, WebSockets (Django Channels), Celery + Redis

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Redis · schema design and query optimisation

Cloud & DevOps: AWS, Docker, GitHub CI/CD, Nginx, Vercel, Google Cloud Platform

Testing & Practices: PyTest, unittest, Git workflows, data structures, design patterns

AI / LLM: LangChain, tool-calling agents, OpenAI-compatible gateways, TensorFlow, Keras

EXPERIENCE

Full Stack Developer (Sole Developer) — Aarmarks Media

Live aarmarksmedia.com · Case study /aitremarkiq

Aug 2026 – Present · TriMarkity SaaS suite

Django 6.1 / DRF · React Native · Flutter · PostgreSQL · MongoDB · Redis · Celery · Docker · AWS · JWT

- **Shipped 2 production applications in under 3 months as the only engineer**, owning the data model, REST APIs, mobile clients, tests, AWS deployment and production debugging.
- **SocialSnap:** built a React Native app on a Django/DRF + MongoDB backend that runs a keyword-triggered social-media automation engine.
- **Field-sales CRM:** built a Flutter + Django/DRF + PostgreSQL + Redis app covered by **~388 automated tests**. Celery Beat generates daily reports at 19:30, and an analytics layer aggregates GPS visits, calls, sales and travel allowance per visit.
- Centralised role-based access in a single `visible_users()` policy, so every endpoint applies the same visibility rules.
- Fixed a JWT signature-verification vulnerability and shipped cross-app session revocation to production across the suite.

AI/ML Intern, Backend — ABis Infotech Solutions

Remote · Nov 2025 – May 2026

- Built Django REST Framework APIs that served model-backed features in a live production codebase.
- Added real-time updates with WebSockets (Django Channels); built Python data pipelines with TensorFlow and Keras and supported cloud deployment.

PROJECTS

DukaanAI — Business Platform for Shop Owners (Founder)

GitHub Abrarbyte · Case study /dukaanai

Flask · MySQL · SQLAlchemy · Redis · LangChain · Flutter · AWS · Razorpay

- Designed, built and deployed the full stack on AWS on my own: Flask API with JWT + bcrypt auth, **45+ REST endpoints** over an 8-table MySQL schema, and a **16-screen** Flutter app.
- Integrated Razorpay/UPI payments and WhatsApp automation; added a LangChain tool-calling chatbot in Hindi, plus dead-stock detection and demand prediction.

ModelReceipt — Verifiable Inference Gateway

Live modelreceipt.vercel.app · Code github

Next.js 15 · React · TypeScript · Neon Postgres · GitHub CI/CD

- Built an OpenAI-compatible proxy in Next.js / TypeScript with provider routing and a durable, append-only Postgres log.
- Built the React verify-and-forge UI and shipped it through a push-to-deploy GitHub CI/CD pipeline.

ACHIEVEMENTS

- **Reverse Hackathon by COOL — finalist:** qualified for the Product Round (final) **ranked 2nd of 32 finalists** from 1,200 participants · Certificate

EDUCATION

Bachelor of Computer Applications (BCA), 2023 – 2026 — Vivekanand College, Kolhapur
