SUMMARY

Software engineer building production Python backends with applied AI. Currently ship features across a live multi-app SaaS suite — Django, DRF and PostgreSQL — where I closed a JWT signature-verification vulnerability and delivered cross-app session revocation. Six months of hands-on AI/ML engineering (TensorFlow, Keras) and a LangChain tool-calling agent running inside a live merchant platform. Comfortable owning a service end to end: schema design, REST API, auth, deployment.

EXPERIENCE

Software Developer — Aarmarks Media

Aug 2026 – Present · Kolhapur / Remote · TriMarkity suite (AITremarkIQ, SocialSnap)

- Develop and maintain features across a live multi-app SaaS suite in Python/Django, including the AITremarkIQ AI product and SocialSnap's keyword-triggered automation engine.
- Identified and fixed a JWT signature-verification vulnerability; designed and shipped cross-app session revocation to production, closing an account-takeover path across the suite.
- Sole developer of a live field-sales CRM, from Flutter app to Django super-admin dashboard to self-hosted deployment (office server, Tailscale tunnel) — GPS visits, per-visit travel allowance, auto-generated daily reports; Redis-backed 500-leads/day throttle and 24-hour lockout after 5 failed logins.

AI/ML Engineering Intern — ABis Infotech Solutions

MMM YYYY – MMM YYYY · Remote · 6 months

- Built end-to-end Python machine-learning pipelines with TensorFlow and Keras: data ingestion, preprocessing, feature preparation, model training, evaluation and inference.
- Delivered models across NLP and computer vision — next-word prediction, image captioning, face recognition, mask detection, image classification and time-series stock prediction.
- Served model-backed features through Django REST Framework APIs in a live production codebase; added real-time updates over WebSockets (Django Channels); deployed on Google Cloud Platform.

PROJECTS

DukaanAI — AI Business Platform for Shop Owners

Python · Flask · LangChain · MySQL · SQLAlchemy · Redis · Flutter · Razorpay · [Case study](#)

- Built a LangChain tool-calling chatbot in Hindi, integrated into a live merchant platform — reads and writes against a Flask + MySQL backend of 8 relational tables and 45+ REST endpoints.
- Designed an AI insights layer: dead-stock detection and demand prediction surfaced directly to store owners.
- Built the surrounding platform independently — JWT + bcrypt auth, inventory, billing, credit tracking and reporting; 16-screen Flutter app; Razorpay/UPI payments and WhatsApp automation.

ModelReceipt — Verifiable Inference Gateway

Next.js 15 · TypeScript · Neon Postgres · Python · [Live](#) · [Code](#) · [Case study](#)

- An OpenAI-compatible proxy that returns a signed, independently verifiable receipt for every completion — naming model, version and deployment, and committing to the prompt and answer without storing either.
- Built provider routing, a durable append-only Postgres transparency log where a primary key on leaf_index turns concurrent writes into a detectable conflict, HMAC-keyed subject references, an L0–L3 assurance ladder, the verification UI and a Python client.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, PHP, C, C++, C#

Backend & APIs: Django, Django REST Framework, Flask, FastAPI, REST API design, JWT authentication, WebSockets, Celery, Redis, SQLAlchemy, Pydantic

AI/ML: TensorFlow, Keras, Scikit-learn, Pandas, NumPy — data preprocessing, feature engineering, model training and evaluation, deep learning, NLP, computer vision

LLM / GenAI: LangChain, tool-calling agents, prompt engineering, OpenAI-compatible APIs, retrieval and chatbot design

Databases: PostgreSQL, MySQL, SQLite, MongoDB — schema design, relational modelling, query optimisation

Frontend: Next.js, React, HTML, CSS, Flutter

Cloud & Tools: Google Cloud Platform, Vercel, Docker, Git, GitHub, Postman, PyTest, unittest, Linux, VS Code

EDUCATION

Bachelor of Computer Applications (BCA) — Vivekanand College, Kolhapur · 2023 – 2026

Preperverse ML Contest — strong overall performance
